CHOICE GLADIOLI

CARPENTER'S ORIGINATIONS

The season of 1935 was by far the wettest season we have ever had here. It opened wet, ended wet, and was wet throughout the entire season.

Most of our Glads did very well, with the exception that a few of the late varieties were made still later by the wet weather and some varieties were frozen without blooming.

The extra early varieties bloomed fine. Miss Harriet, Licketysplit, Gypsy Girl, Segrid Stein, were the first to bloom, and these were followed by Normanda, Jean Phyllis, Marion Louise, Flossie, Marolee, Dorothy Dell, Gold Eagle, and Mary Frey. Soon after these came Miss Gladys Clark, Bonniebelle, Berty Snow, and others.

Jean Phyllis, Gladys Clark, and Marion Louise, were especially fine, and although we charged more for them as cut flowers, we could not nearly supply the demand. We would like to have 10,000 bulbs of each of these varieties, for our own cut flower trade.

Because of the weather conditions we did not get many of our Glads planted until June. Phyllis McQuiston, Recovery, and Prairie Gold were not as early as common, because of this, but nevertheless were very fine. Picardy, Wasaga, Minuet, Giant Nymph, Sirene, and Albatross all bloomed fine. There were also a few varieties that did not seem to do well in such wet weather, among these were Pfitzer's Triumph, Yvonne, Chautauqua, and a few others.

Among our seedlings in our trial plot, we had some of the best we had ever raised. We now have three or four large white seedlings, some growing nearly 6 ft. in height, with 26 to 28 buds on a spike, and 7 or 8 open.

We now have several double seedlings, which come 100%

JEAN PHYLLIS

THE ASHVILLE FLOWER FIELDS

C. A. CARPENTER, Proprietor

ORIGINATOR AND GROWER OF CHOICE GLADS
ASHVILLE, NEW YORK

8 petaled florlets. We have developed these by continuous breeding for double Glads for the past fifteen years. There are two or three very good pinks and some good white ones. One of these whites is a new and different type. It opens up round and flat, and the outer edge of the petals turn up and in, similar to a large white rose.

We are not introducing any of our own seedlings this year, but my brother has been hybridizing and raising seedlings for the past ten years, and we are going to put out one of these that is too good to go unnoticed. You will see that the price of this is not high. We, like a few others, prefer to keep our seedlings a little longer, and instead of pricing them at ten dollars, we will introduce them at a much lower price. We are sure that this will be as good or better than those we formerly priced at ten dollars.

◆ "Carpenter's Glads Speak for Themselves" ◆

CARPENTER'S ORIGINATIONS

VERNITA—Originated by Myrl W. Carpenter, Warren, Pa., for 1936. We have grown this Glad for two years, and find it very good. It grows nearly 5 ft. tall, with 20 buds on a spike. It has 7 flowers open, and its facing and spacing is very good. Last year we sent some of this to "Spring Green Post," Wisconsin, for their trial plot, and they gave a very good report on it. The color is Jasper Red shading lighter toward the center, with a spectrum red blotch. It has very good substance and is a good keeper. Price \$1.00 each, any size.

BONNIEBELLE—This is a very showy Glad. Color, Grenadine red with a light orange blotch on the three lower petals. Attracted much attention in our display at Toledo. Flowers well placed on fine spike.

CHAUTAUQUA—A large geranium pink beautifully marked, with the inner half of each petal overlaid with old rose, and a small jasper red feathering. It sometimes has small dark smoky flecks around the outer edge of the petals, giving it a smoky effect. It is a strong grower, and produces a fine spike, having about twenty buds, and has five or six flowers open at once. We consider this the best of any of the smoky Glads we have ever grown.

DOROTHY DELL: (1932) Orange Chrome, shading to a light orange yellow in throat with a slight feathering of red. This is by far the best orange we have ever seen. It is a very strong grower with a wonderful spike of eight large blooms open at once. They are well placed, and a substance that we have been looking for. It produces an abundance of bulblets that grow.

FANNY CROSBY—One of the finest Glads we ever grew in our trial grounds. Color: Creamy white with a shade of light yellow in throat. It has a waxy texture like a lily. It has 18 to 20 buds on a fine straight spike, 8 open. Wonderful substance, facing and spacing fine. Every spike that bloomed last season had several flowers with 8 to 12 petals. We are using this for a breeder, hoping some day to get a double Glad.

GLADYS CLARK—A tall Eosine Pink with a slight Begonia rose feathering in lower petal. A wonderful color and a wonderful Glad. Spikes always straight, flowers very well placed, seven open at one time, often over 20 buds on spike, fine substance, good size and a good propagator of bulblets that grow.

It blooms about the same time as Evelyn Kirtland.

GYPSY GIRL—An extra early Glad, with large round petaled type flowers. It grows about four feet tall, throwing a straight spike, with twenty or more buds, and having seven or eight well placed flowers open at once. Its color is scarlet, with a light yellow throat blotch. We consider this one of the finest Glads we have ever introduced or grown.

JEAN PHYLLIS: (Int. 1932) Color: La France Pink with sulphur yellow blotch and a very slight coral red feathering. The color is about the same as Ella Day, when E. Day does not fleck, but we have had no trouble with this flecking. It also grows larger and has a better spike, with a fine long shank, 24 buds, eight very large blooms (often over six inches) open at once. It stands the hot sun better than any other glad, of its size we have ever tried. 4½ ft. high.

LICKETYSPLIT — Color: Geranium pink shading to flesh pink in the throat, with a carmine red feathering on lower petals. This is very early, of fine substance with a fine spike that is always straight. Flowers open up well and are very well placed. We like this one very much.

MARION LOUISE: (Int. 1932) Color—A pure white with a little cream white deep in the throat. This is a seedling of Mrs. Hornberger and we consider it much better. It is larger, earlier and a marvelous keeper as a cut flower. It is a wonderful propagator and usually grows four feet tall, with 20 buds and five to eight blooms open at once.

MAROLEE, (Int. 1927)—A very large flower that opens up very different from most Glads and attracts much attention because of its shape and color. Color is jasper pink with a buff yellow blotch and a tinge of scarlet around blotch and sometimes on edge of petals. See illustration.

MISS HARRIET — Color: Crome orange shading to lemon yellow in throat, good straight spike 3½ ft. tall with 14 to 16 buds, four or five open. Flowers well placed and the substance very good, be sure to try this one.

MISS MABEL—A cupieine orange, shading to yellow in the throat, with a slight scarlet flame feathering. Its flowers are of the triangular type with plain petals. This hardy prim grand grows about forty inches high, and is a robust grower.

OTHER VARIETIES

We have many varieties not listed here. If you do not find it, write us, we may have it.

DOLLAR SPECIALS

40 bulbs mixed \$1.00.

A wonderful assortment with wide range of color, made up mostly of named varieties of a value hard to beat for the price.

1 box \$1.00; 12 boxes \$8.00.

QUALITY MIXTURE

A high grade assortment made up mostly of named varieties which would cost nearly twice as much if purchased separately. Can not fail to please the most exacting. Wide range of color.

\$.40 per Doz., \$2.00 per 100

ABOUT SIZES

Commercially the gladiolus is divided into six sizes: No. 1 is over 1½ inches in diameter; No. 2 is 1¼-1½; No. 3 is 1-1¼; No. 4 is ¾-1; No. 5 is ½-¾; No. 6 is below ½ inch. For retail trade Nos. 1 and 2 are called large by most growers and No. 3 and No. 4 medium. These are my sizes. But a few growers call No. 3 large and Nos. 4 and 5 medium. Such growers can make very low prices. Be sure what size the grower is offering for the money.

For the benefit of those wishing to trade bulbs for some of "Carpenter's Originations", we wish to say that we can use some of the following: Aida and Recovery in Nos. 4, 5 and 6. Minuet, Tennyson, Veilchenblau, and Picardy in Nos. 3 or 4, and would like to try some of the best of the new varieties.

NOTICE

Please Read Before Ordering

No retail orders filled for less than \$1.00 as all orders for less than \$1.00 are filled at a loss.

Where offered by the dozen, six may be ordered at half the dozen price. Less than six at single rate, or as otherwise stated in our price list.

OUR TERMS

Prices are for cash with order. A 20% payment will hold an order for future delivery. All bulbs will be post-paid.

All offerings are subject to previous sale.

All descriptions are as accurate as we are able to write them. The description of our ORIGINATIONS are based on Ridgeway's Standard Color Chart.

PURE MAPLE SUGAR

Do you want some real MAPLE SUGAR made from pure Maple Sap?

Every spring in March and April we produce some. REAL QUALITY, too. Every bucket and spout is washed and scalded thoroughly, and when they are set to the trees every bucket has a cover to keep out dirt, rain, etc. Then we have the best evaporator we could get. Sanitary conditions and rapid process of evaporations are absolutely necessary to produce a fancy quality.

We make our sugar into two ounce rectangular cakes. Eight cakes make a one-lb. package 1½ inches thick, 3¼ inches wide, and 5 inches long. Price, one lb. package \$.35, postage extra; five one-lb. packages \$1.50, postage extra.

Maple syrup \$1.75 per gallon, postage extra.

OUR GUARANTEE

Our bulbs are all guaranteed to be true to name, and will be replaced free of charge if not found so. Errors may occur occasionally. Should this happen, notify us at once and correction will be promptly and cheerfully made. You are the judge.

WE THANK YOU

We would be grateful to you if you would send us the names of your friends whom you know to be interested in Glads.

When you send in your order, just try it and see what you get for your trouble.
